EDUCATION

University of California, Santa Barbara

Master of Science in Computer Science GPA: 3.70/4.0

September 2024 - December 2025

University of California, Santa Barbara

Bachelor of Science in Computer Science GPA: 3.74/4.0

June 2020 - June 2024

Relevant Coursework: *Data Structures and Algorithms, Databases, Computer Organization and Architecture, Operating Systems, Programming Languages, Machine Learning, Distributed Systems*

EXPERIENCE

Research Assistant

October 2024 - Present

University of California, Santa Barbara

Goleta, CA

- Analyzed academic research papers to identify trends in large language models for event logs, focusing on anomaly detection and error tracking
- Presented findings from papers at 10+ weekly meetings, leading discussions on applications and potential research directions

Club President

March 2023 - Present

UCSB Super Smash Bros Club

Goleta, CA

- Demonstrated organization and project management skills by hosting UCSB's weekly tournament series, culminating in over 200 participants across 1 quarter
- Took the initiative to organize and promote advertising committees to expand average club attendance by 33%
- Organized brackets, schedules, and player communication for smooth tournaments.

PROJECTS

Event Reservation Application | *Ruby on Rails, Docker, Git, AWS*

- Created a full-stack social web application featuring event reservation functionality, enabling users to create, browse, and RSVP to events, with an intuitive and responsive user interface.
- Conducted load testing using Tsung, simulating up to 5,000 concurrent users, and optimized system performance, reducing response times by 30% and increasing throughput by 20%.
- Enhanced database query efficiency, cutting average query execution time by 40%, resulting in smoother reservation workflows for events with high user engagement.

Enrollment Assistant Extension | *Typescript, React, Python, Git, FastAPI*

- Programmed a google extension to assist over 20,000 UCSB students in constructing their course schedules
- Constructed a user-friendly navigation page using React and a robust backend using FastAPI, providing an engaging user experience and seamless data processing
- Built a chatbot system tailored for providing answers to any course related questions , providing users with accurate and immediate answers and reducing the time to search for classes by 30%

Kindle Display | *Docker, Git, Python, Javascript, React, Express, AWS*

- Completed a kindle device that takes images and messages and displays them using a Raspberry Pi and an E-ink
- Developed a web app to support the kindle using React for the frontend and Express for the backend, allowing users to send images and messages effortlessly from any location
- Deployed the app on an EC2 instance using AWS, improving the runtime and stability of the web app by 200%

Course Search Web Application | *Java, Javascript, React, Springboot, Maven, Heroku, MongoDB, Git*

- Actuated a new search to the app that allows users to filter for a specific course between a start and end quarter
- Implemented a Google Oauth feature to allow users to create an account and log in
- Practiced TTD Development, maintaining 100% mutation coverage for Github's CI/CD pipeline using Jacoco
- Facilitated Agile collaboration, leading daily standups and sprint retrospectives to promote team discussion

TECHNICAL SKILLS

Languages: Java, Javascript, Python, C++, C#, JavaScript, R, SQL, Typescript, Ruby

Frameworks: React, Express.js, Node.js, Flask, Ruby on Rails

Developer Tools: Github, MongoDB, Docker, AWS, Microsoft Azure
